Routine Inspection by User

Make sure you check your doors regularly for signs of wear and tear or damage and get these problems fixed by an engineer before a small problem becomes a huge one. Look after your doors and make sure they are opening and closing properly, there are no obstructions which could cause damage and look out for anything that isn't quite right.

It is important you keep your door clean and clear of obstructions. If you are going to clean your door please turn it off at the mains and wipe the doors and sensors, please do not alter the effectiveness of the sensors. It is not advised that you touch the automation/electronics of the door.

Annual Inspection, service and maintenance

The annual inspection, service and maintenance of the Vizi-Fast door must be carried out by a competent engineer. It is recommended that a industrial door service to be conducted at least once a year to comply with Health and Safety regulations.
